The Soho Brick panel system consists of high definition replicas of Century old weathered brick. The brick faces are cast from high density gypsum in high definition silicone moulds. They are truly realistic both in texture and visually, and are totally maintenance free. The colors are UV resistant and will not fade. The Soho Brick panel system is environmentally safe, non-polluting and non-toxic, are "Class A" fire rated, and have zero smoke propagation.

Each panel consists of 24 individual brick faces approximately ¼" thick, pre mounted, and pre spaced on a fibreglass mesh (similar to drywall tapping mesh). Each sheet covers 4 square feet, and there are 6 sheets per box , for a total coverage of 24 square feet per box. These are available in Chicago Yellow Buff, and Traditional Red.

The Chicago Yellow Buff brick consists of three shades of yellows placed at random so there is no pattern. Likewise for the Traditional Red.

The cost is \$130.00 CDN per box, the US equivalent is approximately \$117.00 USD per box. We ship any quantity direct to anywhere in North America from our factory in Toronto, Canada.

MasterCard, Visa, and American Express are welcome.
